

Application No.: 09/940,737

Amendments to the Claims:

This listing of claims will replace the corresponding claims in prior versions, and listings, of claims in the application:

Delete Claims 1-6, 11-17 and 24-28.

33. (Added) A backup system comprising:
memory for storing digital data;
a processor coupled to said memory for controlling the data exchange;
a connector coupled to said processor for holding and connecting a first SIM
card (subscriber identity module card) and transfers data of said first SIM
card to said memory;
an input means for inputting instructions to said processor;
a power supply coupled to said processor for providing power; and
a displayer coupled to said processors for displaying said data;
wherein said processor restores said data to a second SIM card according to
said inputting instructions.
34. (Added) The system as set forth in claim 33, wherein said memory comprises flash
memory.
35. (Added) The system as set forth in claim 33, wherein said memory comprises
electrically erasable programmable read only memory (EEPROM).
36. (Added) The system as set forth in claim 33, wherein said display comprises a liquid
crystal display.
37. (Added) The system as set forth in claim 33, wherein said display comprises a light
emitting diode display.
38. (Added) The system as set forth in claim 33, wherein said inputting device comprises
a keypad.
39. (Added) A communication device comprising:
memory for storing digital data;
a processor coupled to said memory for controlling the operation of said
communication device;

Application No.: 09/940,737

a connector coupled to said processor for holding and connecting a first SIM card (subscriber identity module card) and transfers data of said first SIM card to said memory;
an input means for inputting instructions to said processor;
a power supply coupled to said processor for providing power;
a displayer coupled to said processors for displaying said data; and
a communication module coupled to said processor for transmitting and receiving signals, wherein said communication module identifies a user ID according to said data;
wherein said processor restores said data to a second SIM card according to said inputting instructions.

40. (Added) The communication device as set forth in claim 39, wherein said communication module includes a telephone.
41. (Added) The communication device as set forth in claim 39, wherein said communication module includes a mobile phone.
42. (Added) The communication device as set forth in claim 39, wherein said memory comprises flash memory.
43. (Added) The communication device as set forth in claim 39, wherein said memory comprises electrically erasable programmable read only memory (EEPROM).
44. (Added) The communication device as set forth in claim 39, wherein said display comprises a liquid crystal display.
45. (Added) The communication device as set forth in claim 39, wherein said inputting device comprises a keypad.
46. (Added) A personal digital assistant (PDA) comprising:
memory for storing digital data;
a processor coupled to said memory for controlling the operation of said communication device;
a connector coupled to said processor for holding and connecting a first SIM card (subscriber identity module card) and transfers data of said first SIM card to said memory;
an input means for inputting instructions to said processor;
a power supply coupled to said processor for providing power;
a displayer coupled to said processors for displaying said data; and
an assistant module coupled to said processor for managing personal data;
wherein said processor restores said data from to a second SIM card according to said inputting instructions.

Application No.: 09/940,737

47. (Added) The personal digital assistant as set forth in claim 46, wherein said memory comprises flash memory.
48. (Added) The personal digital assistant as set forth in claim 46, wherein said display comprises a liquid crystal display.
49. (Added) The personal digital assistant as set forth in claim 46, wherein said inputting device comprises a keypad.
50. (Added) The personal digital assistant as set forth in claim 46, wherein said inputting device comprises a touch screen panel.
